

Required setup links

- Template branch: <https://github.com/SuperiorByteWorks-LLC/agent-project/tree/feat/agri-skills-for-agent-project>
- Skills source: <https://github.com/borealBytes/ag-skills/tree/skills-content>

OpenCode import prompt (paste as-is)

```
Import skills from
https://github.com/borealBytes/ag-skills/tree/skills-content into this
current project and make them available for OpenCode to use.
```

Core target

- Real field boundary + real SSURGO polygons
- One SSURGO attribute choropleth on basemap
- Nice title + legend
- Buffer operation shown
- Final panel image with embedded data table

Submit

Item	Required?	Notes
Branch/repo link	Yes	Assignment 4 branch
Run screenshots	Yes	Show successful run + map outputs
Final panel image	Yes	3x4 (or chosen layout) with map content + table

Tip: Ask for transparency on both the basemap/background and the overlay layers (around

- ### OpenCode import prompt (paste as-is)

Import skills from

<https://github.com/borealBytes/ag-skills/tree/skills-content> into this current project and make them available for OpenCode to use.

Core target

- One successful imagery-read example
- At least one single-band image output (for example red or NIR)
- One NDVI image output
- Short markdown walkthrough with inline images
- Inputs + scripts + outputs captured in repo

This is intentionally narrower because Class 7 workflow is heavier.

Submit

Item	Required?	Notes
Branch/repo link	Yes	Assignment 5 branch
Run screenshots	Yes	Show successful run + NDVI output
Single-band image	Yes	Show read-step output clearly
NDVI image artifact	Yes	At least one NDVI image in repo
Markdown walkthrough	Yes	Inline single-band + NDVI images

Real-Data Rule (Assignments 4 and 5)

From here on out, use real data workflows for these assignments.

Optional Extra Evidence

If you add extra evidence (notes, extra outputs, provenance details), keep it in your repo and add a short note in Google Classroom saying where it is.

For easier instructor review, keep assignment artifacts in root data/ and follow data/README.md.
